

Ikelitehousing for Canon Powershot A2000 IS & A2100 IS

The compact digital housing is molded of corrosion free, virtually indestructible clear polycarbonate. An unobstructed view of the main o-ring provides assurance that the case is sealed properly. Its heavy duty walls allow it to operate safely to 60m.

All functions of the camera are accessible through the housing except the print button. A flash diffuser is included to aid in improving lighting quality when the camera's built-in flash is used to illuminate subjects underwater.

External wide angle lens can be fitted.

Complete strobe systems are available for either automatic or manual exposure.

RRP \$780.00

Ikelitehousing for Canon Powershot SX200 IS

The Ikelite compact digital housing is molded of corrosion free, virtually indestructible clear polycarbonate. An unobstructed view of the main o-ring provides assurance that the case is sealed properly. Its heavy duty walls allow it to operate safely to 60m.

All functions of the camera are accessible through the housing. A flash diffuser is included to aid in improving lighting quality when the camera's built-in flash is used to illuminate subjects underwater. A portion of the camera's built-in flash is blocked by the lens port resulting in darkness in the lower right hand portion of the image. For best results an external Ikelite strobe is recommended.

The housing's lens port accepts the optional WD-4 Wide Angle Conversion Dome. The WD-4 corrects for refractive magnification to give the camera's full angle of coverage underwater. The conversion dome may be removed and replaced underwater and requires no modification to the housing's standard port.

RRP \$780.00

RECALL NOTICE! SI TECH DRY SUIT INFLATION HOSE SUBJECT TO RECALL FOR REMOVAL OF PLASTIC FLOW RESTRICTING INSERT!

DO NOT dive with a hose subject to this recall (or any other equipment that has been connected to such a hose) until the insert has been removed by knowledgeable service personnel.
Name of product: SI TECH dry suit low pressure inflation hose manufactured between August 2006 and February 2009.
Manufacturer: SI TECH AB, Lysekil, Sweden. Hazard: The hose contains a flow restricting insert, of color black, blue or green.
Reports of an indicated malfunction of the flow restricting insert in the hose for the suit have been submitted to SI TECH. The insert may malfunction by dislodgement from the connection valve, potentially causing an obstruction of the air flow. Purchase point: The hose most likely is sold with your dry suit. It may also

have been sold separately at a local dive retailer or a diving equipment distributor. Recommended action: SI TECH has called for a total stop of distribution and sales of the product with the plastic insert. Please contact your point of purchase or local diving equipment retailer for further information regarding REMOVAL of the black, blue or green plastic flow restriction insert. Affected batches and instructions due to the recall for REMOVAL of insert can be found at the company website. IF you have had the black or blue insert substituted, the green insert must be removed.

Aqua Lung's all new Titan LX

The redesigned Titan LX includes new features like Aqua Lung's auto-closure device (ACD), and is actually lighter making it travel friendly. The ease of breathing is rated superior on the ANSTI breathing machine. The auto-closure device (ACD) keeps corrosive water out of the first stage ensuring top performance. The balanced diaphragm first stage is environmentally sealed and provides superior, consistent performance from beginning to end of a dive. A pneumatically-balanced second stage results in superior ease-of-breathing. Available in yoke (3300 psi / 232 bar max) or din (4350 psi/300 bar max). The T-shape of the first stage optimizes the location of the 4 MP ports and 1 HP port. Uses parts common to other Aqua Lung models for easier servicing. The easy-to-grip venturi lever prevents unwanted freeflow at the surface while giving a performance boost at depth. Compatible with nitrox, up to 40% O₂, new out of the box. Equipped with Aqua Lung's patented Comfo-bite mouthpiece along with a reusable mouthpiece tie.
